PRODUCT SPECIFICATION / PRICE LIST

PRODUCT OVERVIEW

LJB Designs specialises in the creation of depth defying three dimensional wall-coverings through the combination of digital fabrication and hand-crafted techniques, targeting both domestic and commercial interior design/architecture. The collection aims to produce tactile design solutions which offer participation through the senses of touch and encourage mindfulness through texture and calming colour combinations.

Each tile is made using Jesmonite which is a water-based solvent-free acrylic resin composite which is cured at room temperature. This material is strong and durable and allows the tiles to be fire, impact and weather resistant, lighter than stone and glass reinforced concretes and suitable for both interior and exterior environments.

All tiles are handmade and pigmented by eye and therefore take on a tonal variety when grouped together. The range can be customised to the colour palette of the intended project.

The tiles are made to order and are currently produced in small batches.

To clean the tiles, simply wipe down with soapy water and dry with a soft cloth.

Below image is a visualisation.

SCALLOP TILE

The Scallop tile is a depth defying art deco inspired surface which plays with shadow and evolves in the changing light.

Hand Pigmented

Hand Casted

Material - Jesmonite

Size - 150mm x 200mm x 35mm

Weight - 1030g
